

DESIGN MEMO 6.22

To: Designers, Contractors, and City Departments

Date: October 20, 2020

Subject: Shared Use Path Widths (SUP)

Category: Pedestrian and Bicycle Facilities

Until further notice, this direction will be used for scoping, design, and construction of plans within the City of Columbus Right of Way.

Minimum SUP Width: CIP plans may reduce the SUP width to 8' when detailed in the scope, and no point in the SUP shall be less than 8'. Private development plans may not scope an SUP less than 10' width, but there may be exceptions allowed for 8' pinch points where 10' is infeasible.

Ramp requirements: Ramps in the cardinal direction of the path shall be the width of the SUP, this includes ramps at the beginning and terminus of the path. Ramps not in the cardinal direction of the SUP may be a minimum 4' in width where they do not connect to an SUP across the street.
